
SALON MANAGEMENT, BOOKING & MEMBERSHIP SYSTEM

Complete System Overview

INTRODUCTION

1. CUSTOMER ENTRY (QR CODE / WEBSITE)

When a customer enters the salon, they have three ways to begin:

- They scan the **QR code** displayed in the salon, OR
 - They visit the **website address** printed under the QR code, OR.
-

Homepage Features

Once on the website, the customer lands on a clean homepage that includes:

- Login / Sign Up button
 - "Book a Service" button
 - "Schedule Appointment" option
 - Wallet balance (*for logged-in users only*)
 - Promotional banners (*flyers, discounts, offers*)
 - Available services (*Haircut, Braiding, Gaming, Snooker, etc.*)
 - Announcements (*e.g., "20% off this weekend"*)
-

2. USER TYPES

There are two types of users on the system:

A. Guest Users (*Not Logged In*)

Guests can:

- Book services

- Schedule appointments
- Pay via cash or transfer

Guests do NOT have access to:

- A wallet
 - Membership benefits
 - Booking history
-

B. Registered Users (*Logged In*)

They can do everything a Guest user can do, but also have access to:

- A personal wallet (*deposit and spend*)
 - Membership level (*Silver, Gold, or VIP*)
 - Full history of visits and payments
 - Exclusive membership benefits and discounts
-

3. USER JOURNEY A — GUEST USER (*Not Logged In*)

Step 1 — Landing Page

The customer scans the QR code or visits the website.

They land on the homepage which displays:

- Login / Sign Up button
- "Book a Service" button
- Promotional flyers and banners
- Current announcements and offers
- List of available services

The guest does **not** need to log in to book a service.

Step 2 — Select Service

The customer clicks "**Book a Service**".

The system displays all available services:

- Haircut
- Braiding
- Shaving
- Gaming
- Snooker
- And any other services added by the owner

The customer selects their preferred service and style (*if applicable*).

The system immediately displays the **fixed price**.

Step 3 — Choose Action

The customer is given two options:

- **Proceed Now** (*walk-in, serve me today*)
 - **Schedule** (*book an appointment for a later date and time*)
-

Path A1 — Proceed Now

The customer selects **Proceed Now** and moves to **Select Payment Method**:

Option 1 — Transfer (Paystack)

- Customer receives an account number
- Transfers the exact amount
- Payment is auto-confirmed by the system
- Ticket is generated

Option 2 — Cash

- Customer selects cash

- Ticket is generated immediately
 - Worker collects and confirms payment physically at the point of service
-

Path A2 — Schedule (*Book Appointment*)

The customer selects **Schedule** and fills in:

- Preferred date
- Preferred time
- Preferred worker (*optional*)

They then move to **Select Payment Method**:

- Transfer (*Paystack*)
- Cash (*confirmed at arrival*)

After payment, the customer receives an **Appointment Ticket** containing:

- Ticket ID
 - Date and time
 - Service booked
 - Assigned worker
-

Step 4 — Ticket Generated

Whether walk-in or scheduled, the guest receives a ticket with:

- Unique Ticket ID
- Service details
- Worker assigned
- Payment status (*Paid / Pending*)

This ticket is shown to the worker before any service begins.

4. USER JOURNEY B — REGISTERED USER (*Logged In*)

Step 1 — Sign Up (*First Time Only*)

The customer clicks **Sign Up** and fills in:

- Full name
- Email address
- Phone number
- Password

Account is created. They can now log in at any time.

Step 2 — Log In

The customer enters their email and password and logs in.

Step 3 — Landing Page (*Logged-In View*)

Once logged in, the customer sees the homepage with additional features:

- Wallet — showing current balance
 - Deposit button
 - "Book a Service" button
 - Promotional flyers and banners
 - Announcements and offers
 - Membership level badge (*Silver / Gold / VIP*)
-

Step 4 — Wallet & Membership

Depositing Money

The customer clicks **Deposit** and chooses an amount:

- Quick-select buttons: ₦10,000 / ₦25,000 / ₦50,000 / ₦100,000
- Or enter a custom amount

- Payment processed via Transfer or Debit and Credit card and many others provided by Paystack
- Balance updates instantly in their wallet

Membership Levels (*Automatic — Based on Total Deposits, you can decide the amount this is just an example*)

Level Total Deposited

Silver ₦10,000 and above

Gold ₦50,000 and above

VIP ₦100,000 and above

Membership Benefits

- Small discount on services
 - Priority booking over guest users
 - And Many more as you want
-

Step 5 — Select Service

The customer clicks "**Book a Service**" and sees the full list of services.

They select their service and style (*if applicable*).

The system displays the **fixed price** with any membership discount already applied.

Step 6 — Choose Action

Same two options:

- **Proceed Now** (*walk-in*)
 - **Schedule** (*appointment*)
-

Path B1 — Proceed Now

The customer selects **Proceed Now** and moves to **Select Payment Method**:

Option 1 — Wallet

- Price is deducted instantly from wallet balance
- No external payment needed
- Ticket is generated immediately

Option 2 — Transfer (Paystack)

- Customer receives account number
- Transfers exact amount
- Auto-confirmed
- Ticket generated

Option 3 — Cash

- Ticket generated
 - Worker confirms and collects cash at the point of service
-

Path B2 — Schedule (*Book Appointment*)

The customer selects **Schedule** and fills in:

- Preferred date
- Preferred time
- Preferred worker (*optional*)

They then move to **Select Payment Method**:

- Wallet (*instant deduction*)
- Transfer (*Paystack*)
- Cash (*confirmed at arrival*)

After payment, the customer receives an **Appointment Ticket** with:

- Ticket ID
- Date and time
- Service booked

- Worker assigned
- Membership level noted

Step 7 — Ticket Generated

The registered user receives their ticket with:

- Unique Ticket ID
- Service details
- Worker assigned
- Payment status (*Paid / Pending*)
- Membership level

From this point forward, both Guest and Registered users follow the exact same Worker Process.

Key Differences — Guest vs Registered User

Feature	Guest User	Registered User
Login required	No	Yes
Has wallet	No	Yes
Can pay with wallet	No	Yes
Membership benefits	No	Yes
Booking history saved	No	Yes
Can schedule appointments	Yes	Yes
Can walk in	Yes	Yes
Discount on services	No	Yes

5. WORKER PROCESS

Step 7 — Worker Verifies Ticket

The customer shows their ticket code to the worker.

The worker enters the code into the system and sees:

- Customer name
- Service requested
- Fixed price
- Payment status

Step 8 — Cash Collection (*If Applicable*)

If the payment method is cash:

- The system displays the exact amount to collect
- The worker collects the full payment
- The worker clicks "**Confirm Payment**"

The worker does **not** enter the price manually — the system records the correct amount automatically.

Step 9 — Start Service

The worker clicks "**Start Service**".

The system updates the worker's status to **Busy**.

Step 10 — Complete Service

After finishing:

- The worker clicks "**Complete**"
- The service is recorded as done
- The worker's status returns to **Available**

Worker Dashboard Summary

Workers can:

- Enter and verify ticket codes
- View full service details for each customer
- Confirm cash payments
- Start and complete services

Worker statuses are either **Available** or **Busy** — the system uses this for auto-assignment.

6. LIVE ACTIVITY DISPLAY

The system shows real-time service activity, visible to the owner and optionally on a screen inside the salon:

Ticket Worker Status

A21 John In Progress

A22 — Waiting

A23 Mary Assigned

The owner can see at any moment:

- All active services
 - Worker activity
 - Full queue status
-

7. ADMIN DASHBOARD (OWNER VIEW)

The salon owner has full control and visibility across all operations.

Revenue Tracking

- Daily, weekly, and monthly totals

- Breakdown by Cash, Transfer, and Wallet payments
 - Overall total revenue
-

Customer Tracking

- Every visit is recorded
 - Total number of visits per customer
 - Full spending history per customer
-

Worker Performance

- Jobs completed per worker
 - Revenue generated per worker
 - Activity logs (*who did what and when*)
-

Appointment Management

- View all upcoming and past bookings
 - Reschedule or cancel appointments
 - Track attendance
-

Wallet Management

- Monitor all customer wallet balances
 - Track all deposits and spending
-

Transaction Records

- Every service and payment is recorded
- No deletion allowed — only controlled actions
- Full transparency at all times

Service Management

- Add new services
- Edit service prices
- Remove or update existing services
- Organise services into categories (*e.g., Hair, Gaming*)
- Export reports (*PDF / Excel*)

Promotions & Banners

- Upload promotional banners and flyers
- Display offers directly on the homepage
- Manage active announcements

Newsletter System

- Collect customer email addresses
- Send promotions and updates
- Build long-term customer relationships

Worker Management

- Add or remove workers
- Monitor daily activity
- Track individual performance
- Front Desk Attendant activity is tracked separately from service workers

8. CCTV SUPPORT (*Optional Enhancement*)

For the CCTV view we can attach Live Camera View to Dashboard

If CCTV supports IP stream:

We can show:

- Live camera feed

In admin dashboard

10. BENEFITS TO YOUR BUSINESS

Benefit	Details
Financial Control	Eliminates hidden income and under-reporting
Clear Records	Know your exact income at any time
Faster Operations	Organised queue and workflow system
Customer Experience	Structured service with walk-in and booking support for all customers
